

## Educational Vision Statement for Karla Ash

I believe that all students are capable of learning, and should be provided the opportunity to learn. A successful school environment challenges each student at an appropriate level. Students should not be challenged to the point of frustration, nor should any student find the work so easy, that no effort is required to master the concepts.

Schools should be a safe place where students are encouraged to take risks in their learning. Mistakes should be viewed as an opportunity for growth and learning.

As a school leader, my role is to create a professional learning community that supports teachers in classrooms, enhances their professional development, and results in positive impact on student learning.

Schools should not focus, solely, on academic content, but should also teach life skills and character development. A successful school leader must be a person of integrity.

Parent and community partnerships are critical to a successful school. Educating children is a joint venture between home, school, and community.

As a school administrator I have a financial responsibility to the community to be a good steward of the resources. This includes both monetary resources and human resources.

Integrity, fairness, and ethical conduct are the core of a great school administrator.
